EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Wayne Liauh on Sep 6, 2005.

The application has been amended as follows:

Claim 1 now reads:

A hanger for use on a metal rack, said metal rack being horizontally mounted to a wall surface and including a downward bent vertical front, an upper and lower end of which are welded to an upper and lower horizontal metal bar, respectively, so that a plurality of metal wires forming said metal rack vertically intersect with and extend between said upper and lower horizontal metal bars, said hanger comprising a hook portion located at an upper end of said hanger, at least one engaging recess located closely below and behind said hook portion, so that an inner top of said hook portion is located right above an inner end of said engaging recess, and a supporting seat located at a lower free end of said hanger; said supporting seat defining an upper opening and a curved seat, such that a crossbar may be forced into said curved seat via said upper opening; wherein said curved seat on said supporting seat is provided on an inner wall close to said

Art Unit: 3632

upper opening with a horizontal rib, and said crossbar to be supported in said curved seat is provided with an axial groove corresponding to said horizontal rib for engaging with said rib;

whereby when said hook portion is adapted to be hooked to said upper horizontal metal bar at said vertical front of said metal rack, one of said at least one engaging recess is adapted to engage with said lower horizontal metal bar for said hanger to connect to and hang from said metal rack.

Claim 2 now reads:

The hanger for use on metal rack as claimed in claim 1 , wherein a distance from the inner top of said hook portion to an inner lower end of said at least one engaging recess is adapted to be slightly smaller than a distance from an upper side of said upper horizontal metal bar to a lower side of said lower horizontal metal bar at said vertical front of said metal rack.
